

STIX Application Wireframes

These are the hand drawn wireframes of the essential pages for the "STIX Fun Finder" application. The first set are for mobile devices, followed by wire frames for wider screen devices.

Home Page and General Template images for mobile screens

These are the wire frames for the Home page, and for the general template page which is used as a guide for the rest of the site pages.

These are the wire frames for the search results page as well as the "Add content" page.

About Home Contact

Page 3 of 6

This wireframe represents the look and feel of the general page template that will be used for all content pages on the STIX application.

The wireframe for the Search Results page on wider screens

This is the wireframe for the Search results page when displayed on wider screen sizes – medium and up. This page will deviate slightly from the general template in that the whole body area will be used for results.

Wireframe for the "Add content" page as seen on wider screens

ADD Content (School/Club/Event) Page for Medium Screens and up.

(Possible Adds later to monitor?)

Clear Send Form Input Buttons

Contact Scroll up & down between Header & Footer

This wireframe represents the view of the "Add Content" page on wider screens – medium and up. The contact page will be configured in the same way, but with a few less input fields.

(The 2 sections of the page main body might be switched around with the text/placeholder column on the left instead of the right.)
